

HAND DISINFECTION STATION - WALL VERSION

Covid-19 : Disinfect your hands regularly

It has become more than essential to disinfect your hands several times a day to avoid any risk of spreading a virus. Good hand hygiene can effectively fight against the spread of germs that can cause disease. Studies show there is a reduction in the rate of illness when sanitizer gel is offered in establishments. **The Clarisan** hand disinfection station helps protect you, your team and your visitors against any infection or bacteria and therefore acts as a barrier to Coronavirus!

This station provides sanitizer gel without risk of contamination, by simply pressing your elbow on the metal tab. It is a mechanical system, without electrical connection, therefore making it maintenance-free. Answers to multiple applications: offices, reception halls, workshops, logistic platforms, canteens, communities...
